# INDEX TO VOLUME 52

The asterisk (*) preceding the page number indicates an original article. Subject entries are made for all articles. Author entries are made for original articles and society transactions. Book Reviews, Obituaries and Society Transactions are indexed under the letters B, O and S, respectively.

**Abbott, T. R.**: Rational treatment of abnormal labial frenum, *1061
Abdomen, abdominal syndrome of rheumatic disease, *296
acute abdominal pain in sickle cell anemia, 1470
acute, surgical judgment in approach to, 731
acute symptoms in rheumatic fever, 197
agenesia of abdominal wall in new-born, 951
distension, a marked case; probable etiologic factor being abnormal endocrine function, 719
pain, allergic, *1107
pain; chronic hypertensive nephritis with hypotrophy, migraine, abdominal crisis and terminal eclampsia in girl of 8½ years, 472
pain in children, 457
penetration of moist heat applied to abdomen and its effect on intestinal movements, 424
Abnormalities and Deformities: See also Monsters; Twins; under names of diseases, organs and regions, as Fingers and Toes, abnormalities; Foot, deformities; Heart, abnormalities; Microcephaly; etc.
congenital defects, 1194
lacunar skull of new-born, *1375
multiple somatic abnormalities in nursling, 951
osseous; severe osteo-articular dystrophy in girl of 12 years, 1348
physiological postural deformities in contrast to pathologic postural deformities, 1258
teratogenic influence of threatened abortion, 951
Abortion, teratogenic influence of threatened abortion, 951
Abscess: See under names of organs and regions, as Brain, abscess; Liver, abscess; Lungs, abscess; etc.
Abt, I. A.: Dedication of Jacobi-Schurz Memorial Park, 920
Acetarsone in congenital syphilis in young infant, 1215
Acetone in Blood: See Blood, ketone bodies
in Urine: See under Diabetes Mellitus; Urine, ketone bodies
Ach index as applied to South African boys, 432
Achondroplasia, chondrodystrophia fetalis: roentgen study of 4 cases, 2 in father and daughter, emphasizing epiphyseal change and variants, 684
chondrodystrophy, case of, 476
dyschondroplasia, case of, 479
dyschondroplasia, mild form of, 1195
Acid, Ascorbic: See Acid, cevitamic
Cevitamic: See under Scurvy; Vitamins, C
hydrochloric; stricture following ingestion of muriatic acid, 1227
Muriatic: See Acid, hydrochloric
Acidosis and acetonuria in infancy, 677
by asphyxia, 677
excessive amounts of ammonia in urine as expression of acidosis in acute gastro-enteritis, 1477
in infantile beriberi, 682
or alkalosis in gastro-intestinal disturbances, chronic nephritis and diabetes, 175
Aclasis, Diaphyseal: See Exostoses
Acne vulgaris, nutritional treatment, 482
Acrodynia, 1004, 1498
cases of vegetative neurosis (Feer's disease), 1257
infantile, 1256
infantile, capillaroscopy in, 1256
infantile, 3 additional cases, 1255
infantile, yearly and seasonal incidence, 1255
neurologic conditions, 221
pink disease, 1498
rapid cure by acetylcholine, 730
various cases and their treatment, 1255
Adams, J. M.: Otogenic suppurative parotitis; report of 5 cases, *608
Adenitis: See under Lymph Nodes
Adenoids, infection, pharyngeal palpation in, 973
infection: serum cholesterol values for children with, *784
vegetative nervous system of children with, 974
Adenoma of hypophysis; anatomic examination in case of neurologic obesity, 1490
Adenopathy: See under Lymph Nodes
Adhesive plaster, allergy to adhesive tape; report of 2 cases, 1002
Adipose Tissue: See Fat; Obesity
Adler, E. L.: Treatment of gonorrheal vaginitis, 500
Adolescence, feeding in, 426
mineral metabolism of, *41
precocious, in case of osteitis fibrosa cystica, 743
precocious puberty and hypergenitalism, 991
precocious puberty and overgrowth, 180
precocious puberty and pseudohermaphroditism, 1486
precocious sexual maturity in girl of 15 months, 233
predicting puberty, 682
Adrenal Preparations: See also Epinephrine
cortin (adrenal cortex extract) used in experimental chronic fatigue, 1267
insulin-adrenalin treatment by Clausen method, 1246
Adrenals, cevitamic acid content in animals, 946
comparison of pituitary basophilic syndrome and adrenal corticogenital syndrome, 995
familial congenital adrenal syndrome, *308
involution in new-born: biochemical inquiry into physiologic significance, *863
lipoid content of, pathologic alterations, *54
pathologic alterations in lipoid content of, *54
relation to allergic phenomena; specific therapeutic effects of cortical adrenal extract in asthma, 727
relation to allergic phenomena; therapeutic effect of strychnine stimulation of adrenal medulla in asthma, 728
some factors influencing length of survival following bilateral suprarenalectomy, 1489
tumor secondary to malignant disease of liver, 995
vitamin C, histochemical localization in adrenal cortex, 179
Agar-agar, pectin-agar preparation for treatment of diarrhea, *259
Age, height-weight-age standards as index of nutrition of children, 431
Agglutinins: See also Antigens and Antibodies; Blood, groups; Immunity; etc.
immunity in diabetes; relative importance of nutritional state and of blood sugar level in influencing development of agglutinin after typhoid vaccine, 475
Agranulocytosis: See Angina, agranulocytic

Albers-Schönberg's Disease: See Osteosclerosis fragilis
Albinism, heredity of albinismus circumscriptus, 1005
Albumin: See Blood, proteins; Protein
Alcohol, experimental alcoholism; attempts to modify concentration of alcohol in blood after intravenous administration, 733
Aldrich, C. A.: Graduate education in pediatrics, *665
Pediatrician's relation to mental hygiene, 1021
Aleukia: See Anemia, aplastic
Alimentary Intoxication: See Toxemia
Tract: See Gastro-Intestinal Tract
Alkali Reserve: See under Blood
Alkalosis or acidosis with gastro-intestinal disturbances, chronic nephritis and diabetes mellitus, 175
renal, 1487
Alkylhydroxybenzenes: See Hexylresorcinol
Allergens: See Anaphylaxis and Allergy; Food, allergy
Allergy: See Anaphylaxis and Allergy; Asthma; Food, allergy; Hay Fever; etc.
Almond-lac in vegetable diet of children; growth and allergy, *1397
Alpers, B. J.: Cerebral birth conditions; rôle of intra-uterine infection and intoxication in man, *144
Amatruda, C. S.: Effect of thyroid therapy on mental and physical growth of cretinous infants, *1117
Amenorrhea of puberty, 1487
Amentia: See Feeblemindedness; Idiocy; etc.
American Board of Internal Medicine, organization of, 936
American Board of Pediatrics, examinations, 936
physicians certified by, 168, 1179, 1445
physicians examined by, 1445
report on graduate education in pediatrics, *665
American Orthopsychiatric Association, meeting, 1179
American Pediatric Society, meeting at Bolton Landing, Lake George, in 1905, 1273
American Public Health Association, report of committee on control of communicable diseases, 956
Aminopyrine, antidiuretic effect, 735
Amyloidosis, renal, case simulating hypochloremia and azotemia, 1488
Amyotonia, Congenita: See Myotonia congenita
Amyotrophy: See Atrophy, muscular
Anaphylaxis and Allergy: See also Asthma; Food, allergy; Hay Fever; etc.
abdominal pain, allergic, *1107
allergy in children, 1497
gastro-intestinal allergy; points to consider in diagnosis, 1003
menotoxin of pregnancy as cause of allergy, *303
milk allergy; basic principles of treatment, 1497
mucous membrane hypersensitiveness; passive local sensitization of ophthalmic mucous membrane, 240
nutrition of children on vegetable diet; growth and allergy, *1397
orris root fingers, 727
pillows, new method for covering, 728
pollen therapy, effect of, on common cold in hay fever subjects, 1003
pulmonary infiltrations, allergic, 1226
relation of allergy to antibody content in animals vaccinated with BCG, 963
serum sickness and therapeutic effect of diphtheria antitoxin, *1325
serum sickness, latent serum reaction, 197
serum sickness, prevention after reinjection of serum by autohemotherapy, 195
serum sickness, tissue reactions in, 197
titration of human passive-transfer antibody by neutralization, 755
tobacco reactions, significance in allergic children, 727
Anemia, 447, 969
acute, grave, during course of infection or undetermined nature; cure by blood transfusions, 204
Agranulocytic: See Angina, agranulocytic
alimentary, severe case of, 206
and acute hemoglobinuria in boy, 233
anemic state, 967
aplastic; hemorrhagic aleukemia on constitutional basis, 207
comparison of anemia produced by feeding young rats on human, cow and goat milk, 1468
congenital, 451
erythroblastic, of Cooley; Mediterranean disease, 1274
familial and hereditary, 450
gastric secretion in, 447
goat's milk, 1471
hemolytic, acute, 451
hemolytic, constitutional, nature of, 491
hyperchromic macrocytic, in early infancy; report of case and review of literature, *633
hyperchromic, of chlorotic type, 449
iron and iron catalysts in, 201
megalocytic, atypical, 1219
nutritional, in premature infants, 1218
nutritional; size and hemoglobin content of erythrocytes in, *616
of infantile scurvy, 969
of mother and child, 209
of new-born, 971
of new-born, report of case with reference to therapy, 1275
prescorbutic, 1452
prevalence of reduced serum proteins in southern clinic, 748
pseudoleukemic, late results of splenectomy in, 970
pseudoleukemic, of children (anemia of von Jaksch), 1471
sickle cell; acute abdominal pain in, 1470
sickle cell; fatal poisoning with oil of chenopodium in Negro child with, 488
splenic, and congenital syphilis in infant, 1212
splenic; cyst of bile ducts and Banti's disease, 1510
splenomegaly associated with, in childhood, 202
Anencephaly: See under Monsters
Anesthesia, administration of anesthetics to children so as to prevent fear, 1485
efficiency of analeptics as antidotes to pentobarbital, chloral hydrate and tribromethanol ("avertin"), 1008
ether; dosage after preanesthetic medication with narcotics (barbiturates, magnesium sulfate and morphine), 1006
in orthopedics, 1006
prevention of dread of being anesthetized, 471
tribromethanol; avertin as complete anesthetic, 485
Aneurysm and infarcts of heart in infant of 9 months; specimen, 969
vascular syphilis with late manifestations of hereditary syphilis, 1215
Angina, agranulocytic, 446
agranulocytic; rapidly fatal case in child of 5 years
agranulocytic; report of 2 cases, 1473
Diphtheric: See Diphtheria
Vincent's; why Vincent's infection? 1222
Angioma, cutaneocerebral, 224
hemangioblastic sarcoma of eyelid; systematic division of angioblastic tumors, 1253
of kidney; report of case with analysis of 26 previously reported cases, 1240
Angiosarcoma: See under Sarcoma
Anomalies: See Abnormalities and Deformities; and under names of organs and regions
Anorexia: See Appetite
Anoxemia: See Blood, oxygen
Anthelmintics, studies on alkylhydroxybenzenes, 215

Anthrax, intra-uterine transmission, *156
Anthropometry: See also under Body; Growth; etc.
anthropometric study of new-born infants of Japanese parents in America, *321
Antibodies: See Antigens and Antibodies
Antifibrinolysin, placental transmission of, in beta hemolytic streptococcic infection, *61
Antigens and Antibodies, beta hemolytic streptococcic infection; placental transmission of antifibrinolysin and antistreptolysin, *61
duration of demonstrable antibodies in serum of rabbits immunized with heat-killed type II and type III pneumococci, 1183
relation of circulating antibody to local inflammatory reaction to antigen (Arthus phenomenon), 173
Antistreptolysin: See Streptococci, hemolytic
Anuria: See Urine, suppression
Apnea, case of, in premature infant, 979
Apparatus for thermal control of solutions for intravenous administration, 695
Appendicitis, 215
abdominal pain in children, 457
acute; challenge of continuing high mortality, 981
acute; effect on thoracic and abdominal respiratory movements, *1047
acute, problem of, in New York, 1500
and peritonitis, 706
Appendix, abscess in new-born, 1197
Appetite, anorexia in children, 1227
anorexia in infant, 1228
Apple diet, raw, in treatment of diarrhea, 457, 982
diet, raw, in treatment of enteritis, 456
Aqueous Humor, permeability of blood-aqueous barrier and cevitamic acid concentration in anterior chamber, 1189
vitamin C content of aqueous and crystalline lens; relation to cataract, 1252
Argyria: See under Silver
Arms: See also Forearm; Humerus
treatment of fractures of limbs in children, 1500
Arrhythmia: See also Heart, block; Heart, rate
Arsenobenzene, purpura haemorrhagica due to; blood transfusion; cure, 204
Arsphenamine, pharmacologic and pharmacodynamic reactions of childhood, 734
Art, drawing as evidence of mental development, 470
drawing as indication of mental development, 470
expression of motion in creative art? 471
Arteries: See also Aneurysm; Blood, pressure; Pulse; Thrombosis; etc.
abnormality, congenital; left coronary artery arising from pulmonary artery, *1427
arterial changes in brain in childhood, 984
choroidal anterior, syndrome of, 1480
Arteriosclerosis, in child with malignant nephrosclerosis, 1220
in diabetes; relation between plasma cholesterol and arteriosclerosis, 993
Arthritis, 477. See also Rheumatism
chronic, atrophic; treatment with autogenous streptococcus filtrates (antivirus), 237
deformans, Still's disease; clinical histopathologic study, 999
deformans; Still's disease; splenomegaly in child; for diagnosis, 1491
gonorrheal, fever therapy in, 1007
gonorrheal, intra-uterine transmission, *158
nontuberculous, of hip, 478
present status of problem of, review of recent American and English literature, 192
purulent; during course of endocarditis lenta; case report, 1491
rheumatoid; etiology and treatment by diathermy, 1247
suppurative, complicating mastoiditis with unusual manifestations, 1505
Arthus phenomenon, relation of circulating antibody to local inflammatory reaction to antigen, 173
Ash, R.: Prognosis of rheumatic infection; statistical study, *280
Asphyxia, acidosis by, 677
fetal, following artificial rupture of membranes, 1199
neonatorum, 1458
neonatorum; electrocardiogram in, 953
neonatorum, treatment, 1199
neonatorum, use of Drinker respirator in, 453
Asthma: See also Anaphylaxis and Allergy
bronchial, autohemotherapy in treatment of, 977
bronchial, due to menotoxin of mother during pregnancy, *303
bronchial, hyperpyrexia in treatment of, 977
clinical evaluation of positive skin reaction, 728
complicated by bronchiectasis, *882
epinephrine hydrochloride inhalations, *92
epinephrine inhalation for relief of symptoms, 728
in allergic child, 1003
relation of adrenal glands to allergic phenomena; specific therapeutic effects of cortical adrenal extract in asthma, 727
relation of adrenal glands to allergic phenomena; therapeutic effect of strychnine stimulation of adrenal medulla in asthma, 728
some less common pulmonary complications in asthmatic conditions, 703
treatment, 1225
value of breathing exercises in, 1226
Atabrine, intravenous toxicity of, 1260
poisoning; acute motor cerebrospinal polyneuritis of toxic nature with apoplectiform onset in girl of 2 years (atabrine poisoning), 1233
Ataxia, Friedreich's: See Ataxia, hereditary
hereditary, in twins, case report, 462
Atebrine: See Atabrine
Atelectasis: See Lungs, collapse
Athletes, young male athlete, 245
young woman athlete, 245
Athletics, athletic performance as function of growth; speed in sprinting, 180
sports and trauma due to sports, 1259
Athrepsia: See under Nutrition
Atomizer with nonspill feature for inhalation of epinephrine hydrochloride in asthma, *92
Atrophy: See also under names of organs and regions
facial hemiatrophy associated with epilepsy; report of case, 986
Infantile: See under Celiac Disease
Muscular: See also Dystrophy, muscular
muscular; Oppenheim or Werdnig-Hoffmann disease, 239
Atropine, poisoning after instillation of drops, 1502
Avertin: See Anesthesia, tribromethanol
Avitaminosis: See under Deficiency Diseases; Vitamins; and under names of deficiency diseases, as Beriberi; Scurvy; etc.
Azotobacter chroococcum; can it synthesize vitamin D? 1187

**Bacal, H. L.**: Allergic tuberculous purpura, 1018
Rheumatic infection; sedimentation rate and Schilling blood count, 1031
Bachman, A. L.: Macrocytic hyperchromic anemia in early infancy; report of case and review of literature, *633
Bacilli: See Bacteria
Backward Children: See under Children
Bacteremia: See also Diphtheria; Pneumococci; Septicemia; Streptococci; Tuberculosis; etc.
and acute infections of upper respiratory tract, 1221
due to gravis type of corynebacterium diphtheriae, *899
Bacteria: See also Diphtheria, bacilli; Pneumococci; Tubercle Bacilli; etc.
abortus and melitense group, as cause of meningitis, *904

Bacteria—Continued
aerogenes capsulatus; Welch bacillus infections; treatment by autofiltrate method, 959
bifidus, vitamin-like effects of, 430
brucella; brucellosis in man treated with new antiserum, 441
coli; treatment of intestinal and urinary infections (particularly of colon bacillus group) with dibromoxymercurifluorescein of mercurochrome, 459
corynebacteria; bacteremia due to gravis type, *899
Enteritidis: See Salmonella enteritidis
Gas: See Bacteria, aerogenes capsulatus
Meningococci: See Meningococci
Pertussis: See Whooping Cough
Sonne's: See under Dysentery
Streptococci: See Streptococci
Suipestifer: See Salmonella suipestifer
Welchii: See Bacteria, aerogenes capsulatus
Bacteriophage, and culture filtrates for children with cardiac defects, 1218
Balantidiasis in infancy, 444
Banana, use of banana sugar as carbohydrate in milk mixtures for well babies, 426
Banti's Disease: See Anemia, splenic
Baratz, J. J.: Hypothyroidism and cretinism; enlargement of heart with hirsuties (myxedema heart), *128
Barba, P. S.: Cyst of bile ducts and Banti's disease, 1510
Barbital and barbital derivatives; acute poisoning in dehydration and diuresis, 245
Barlow's Disease: See Scurvy
Barnes, D. J.: Comparative value of cod liver oil, viosterol and vitamin D milks in prevention of rickets and certain basic factors influencing their efficacy, 1011
B C G Vaccine: See under Tuberculosis
Beaven, P. W.: Extent and nature of decline of tuberculous infection in children; analysis of data concerning 4,982 children tested with old tuberculin from 1926 to 1934 inclusive, *565
Beef heart, nutritive value after heating and after alcohol extraction, 940
Behavior, consistency of judgments regarding adjustment status of children examined by child guidance clinic, 713
emotional, during early childhood from viewpoint of pediatrist, 228
postencephalitic disorders; 10 year review of Franklin School, 988
problems of pediatrician, 714
psychopathologic and criminologic study of children with conduct disorders, 470
Bell, H. O.: Improvement in diagnosis of whooping cough; correlation between sedimentation rate and cell count of blood on basis of proved cases, *25
Beriberi, Darányi's reaction in, 430
disease of alimentary disequilibrium, 679
infantile, acidosis in, 682
vitamin B deficiency in Cuba; pellagroid syndrome beriberi, 679
Bernard-Horner Syndrome: See Horner Syndrome
Bile ducts, choledochus cyst with double common bile duct, 703
ducts, cyst and Banti's disease, 1510
ducts, malformation of, as cause of bile peritonitis in infancy, *1348
ducts, obstruction, congenital, 1227
peritonitis in infancy, *1348
pigment, metabolism and excretion in icterus neonatorum, 1275
Binder, I.: Meckel's diverticulum; report of case of diverticulitis, 1504
Birth, Injuries: See under New-Born Infants
Bismuth subnitrate, pharmacology of nitrite effect of, 1501
Bites, of black widow spider, 1261
Bladder, calculus, 1241
calculus in urinary tract; study of 21 cases, *513
exstrophy, complete, operative result, 1487
innervation; clinical and experimental studies, 1269
schistosomiasis of, 234
Blennorrhagia: See Gonorrhea
Blennorrhea: See Conjunctivitis of new-born; Ophthalmia neonatorum
Blood: See also Anemia; Erythrocytes; Hemoglobin; Leukocytes; etc.
Acetone Bodies: See Blood, ketone bodies
alkali reserve, 944
alkali reserve; relation between alkali reserve of blood plasma and that of spinal fluid during health and disease, 1186
alkalipenia in children with nephritis, 1487
amino-acidemia, fetal, 685
bactericidal power in sepsis, 197
biochemistry and pathology of avitaminosis; hematopoietic function in deficiency diseases, 1448
calcium and inorganic phosphorus determination; emotional imbalance in children, 469
calcium; relation of diet and serum-calcium to tetany in parathyroidectomized rat, 425
calcium; rôle of serum-calcium fractions in effect of viosterol on bleeding tendency in jaundice, 424
chemical changes in primary pneumonia; acid-base balance before and after crisis; influence of complications, 759
chemical studies in epileptic syndrome; nocturnal and diurnal rhythm in blood chemistry, 706
cholesterol, relation between total and free cholesterol in healthy and in diseased children, 760
cholesterol; value of hypercholesteremia in association with hypothyroidism, 1491
cholesterol values for children, *784
clot; character of, in normal persons and in hemophiliacs, 1278
coagulant, new, investigation of, 697
coagulation; intravascular clotting in abandoned fetal channels in new-born, 1278
count; improvement in diagnosis of whooping cough; correlation between sedimentation rate and cell count of blood on basis of proved cases, *25
count of new-born in relation to icterus neonatorum, 1198
count; Viggo Schmidt test, 1223
diastase content in first week of life, 952
Diseases: See Anemia; Hematopoietic System; Leukemia; etc.
erythrocytes, hemoglobin, reticulocytes and chromatocytes in children from 2 to 14 years old, 1471
fats and lipoids; changes in various fractions of serum lipids following administration of fats with various degrees of unsaturation and different molecular weights, 761
fats; auto-regulation of metabolism, 1184
fats, changes of total lipid and iodine number of blood fat in alimentary lipemia, 174
fats; content of neutral fat in blood of patients with disease of liver, 220
groups, distribution in Campania, Italy, 449
guanidine, glucose and calcium content in eclampsia, 464
hyperlipemia and cholesteroluria, investigations of, 678
hypochloremia and azotemia simulated by renal amyloidosis; case report, 1488
iron; variability of nonhemoglobin iron, 477
ketone bodies; acidosis or alkalosis in gastrointestinal disturbances, chronic nephritis and diabetes, 175
ketone bodies; essential acetonemia, 945
ketone bodies; periodic vomiting with ketonemia; clinical and experimental inquiry into pathogenesis of, 1479

Blood—Continued
lead in; quantitative spectrographic estimation of; its value in diagnosis of lead poisoning, 489
lipemia, amino-acidemia and glycemia during digestion in healthy and in athreptic infants, 943
lipid composition of blood in new-born, *1319
nitrogen; some aspects of acute nephritis in children, 1241
of new-born, 1199
of umbilical cord; lipid composition in new-born, *1319
oxygen; effect of digitalis on acute cardiac dilatation produced by anoxemia, 968
permeability of blood-aqueous barrier and cevitamic acid concentration in anterior chamber, 1189
phosphatase activity in osteogenesis imperfecta, 759, 997
phosphatase; plasma values for normal and rachitic children, 680
phosphatase, site of formation of, 941
phosphorus; hypophosphatemia from epinephrine and mechanism of its production, 996
phosphorus metabolism in course of infectious diseases (anginal diphtheria, tuberculous meningitis and measles), 189
picture in helminthiasis, 193
picture, in infantile sepsis, 196
plasma, viscosimetry, 207
Platelets: See Blood, count; Purpura
pressure, high; arterosclerosis in child with malignant nephrosclerosis, 1220
pressure, high; essential hypertension, 450
pressure, high; occurrence of essential hypertension in rheumatic infections, 749
pressure in certain acute infections, 448
pressure in infancy, 205
pressure; venous pressure in children, *1088
proteins; are they affected by time blood stands before serum is removed from coagulate? 940
proteins, passage of native proteins through normal gastro-intestinal wall, 425
proteins, proteinemia in tuberculosis, 1214
puncture of internal jugular vein for diagnostic purposes, 695
relation between vapor pressure and solutes of serum, 756
reticulated cells, appearance in new-born; relation to icterus neonatorum, 1459
reticulocytes, effect of vitamin C on reticulocytes in certain infectious diseases, 959
Schilling count in rheumatic infection, 1031
sedimentation; rate in rheumatic infection, *1093
sedimentation test; improvement in diagnosis of whooping cough; correlation between sedimentation rate and cell count of blood on basis of proved cases, *25
sedimentation; use of sedimentation reaction and Schilling hemogram in some pediatric conditions, 447
Serum: See Serum; and other subheads under Blood
studies; involution of adrenal glands in new-born; biochemical inquiry into physiologic significance, *863
sugar content influenced by ultraviolet rays, 947
sugar content, relation to various emotional disturbances, 989
sugar; effect of glycerin on, 677
sugar, effect of ingestion of fat on, 177
sugar; glycemia in new-born, 185
sugar, hormonal regulation in infancy, 427
sugar; immunity in diabetes; relative importance of nutritional state and of blood sugar level in influencing development of agglutinin after typhoid vaccine, 475
transfusion, 206
transfusion in children's surgery, 1006
transfusion in pediatric practice, 1262

Blood—Continued
transfusion, latest achievements in U. S. S. R., 207
transfusion, value of repeated transfusions from different donors in cases of septicemia, 1463
ultraviolet irradiation of, influence on some physicochemical constants of, 696
vascular changes in mammal before and after birth, 939
Vessels: See also Arteries; Capillaries; Veins; etc.
vessels, cardiovascular disease, hereditary and familial factors in causation of heart disease among veterans, 968
vessels, effect of magnesium on vascular spasm, 743
vessels; tumor of spinal cord in boy aged 9 years, 462
vitamin D in, *831
water content, experimental study of variations in normal and pathologic conditions, 943
xanthoproteic reaction of, as test of renal function, 1243
Body, growth and development; with special reference to domestic animals, 1453
height and weight of children of depression poor, 683
height inspection of children of school ages; is our population satisfactory? 1454
height-weight-age standards as index of nutrition of children; preliminary report, 431
measurements, correlation with insensible perspiration; proposed basal standards for children, *1335
measurements of Japanese children born in America, 1190
weight, gain, rule for healthy infants; practical application, 181
weight inspection of children of school age; is our population satisfactory? 1454
weight, relation of "correct" weight and blood findings to physicians' estimates of nutrition of school children, 180
weight, results of proper feeding of children between 3 and 6 years of age, 947
Bones: See also under names of bones
atrophy; congenital arthrodystrophy, 1249
atrophy; obesity, dwarfism and multiple osseous dystrophies, 479
changes; gargoylism (chondro-osteodystrophy, corneal opacities, hepatosplenomegaly and mental deficiency), 1194
changes, hepatosplenomegaly associated with mental deficiency and bone changes, 203
changes in chronic fluoride poisoning, 487
changes in nutritional disturbance of infants, 1454
composition of fetal skeleton, 755
decalcification mechanism, 424
Deformities: See Abnormalities and Deformities; Poliomyelitis; Rickets; etc.
diaphyseal aclasis, 997
Diseases: See Osteochondritis; Osteomyelitis; etc.; and various subheads under Bones
Dystrophy: See Bones, atrophy
Fractures: See under names of bones
Fragility: See also Osteosclerosis fragilis
fragility, congenital; recovery in case of, 998
fragility; familial osteopsathyrosis idiopathica, 1249
